

### Program Effectiveness Data

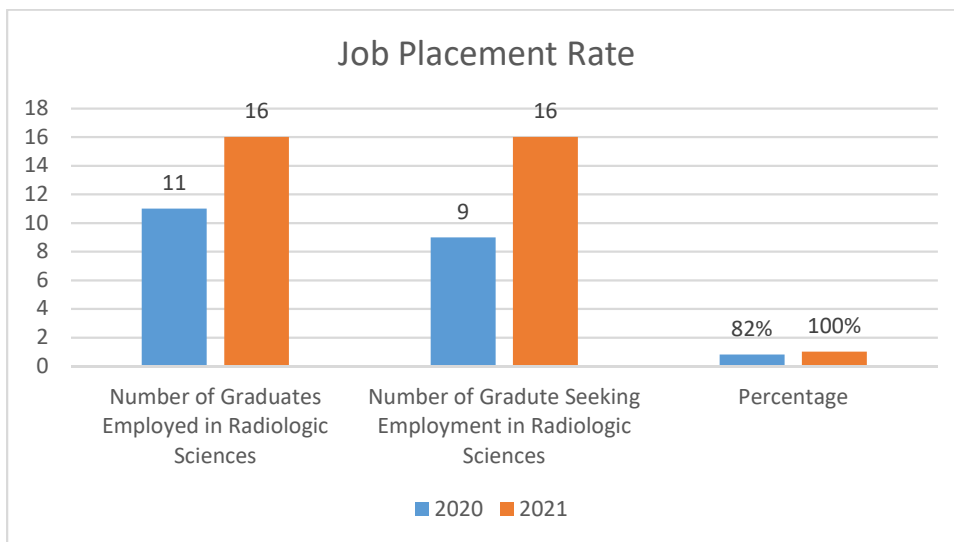

The following is the most current program effective data.

**Credentialing Examination:** The AART (American Registry of Radiologic Technologist) 5-year aggregate pass rate chart compares the pass rate of Mount Aloysius College first-time test takers within six months of graduation to the national average. The five-year average benchmark established by the JRCERT is 75%.

### Program Five-Year Average is 94%

**Job Placement:** The number of graduates employed in the radiologic science compared to the number of graduate actively seeking employment in the radiologic sciences with twelve months of graduating. The five-year average benchmark established by the JRCERT is 75%. Graduates who return to school for advanced degrees, those who do not seek to enter the field, and those who do not pass that AART affect the overall number.

**Program Completion:** The number of students who completed the program within 150% of the stated program length. Data excludes withdrawals before the October freeze date and students included in a previous cohort.
